

The diagram shows a curved section of a panel on the left, labeled 'Section incurvée'. This section is connected to a larger rectangular panel on the right. The rectangular panel has a red border representing the 'Dimension réelle' (actual dimension) and a green border representing the 'Fond perdu' (waste). Inside the red border is a blue dashed line representing the 'Zone visible' (visible zone). The panel is divided into two horizontal sections by a dashed line. The top section is a semi-circle, and the bottom section is a rectangle with rounded corners. The labels 'Zone visible', 'Dimension réelle', and 'Fond perdu' are on the left, with arrows pointing to their respective parts of the panel.
