GS DualBrew

HOT OR COLD, ALWAYS BOLD

Discover the brand new unit from Gaggia Specialties: GS DualBrew. This bean-to-cup machine is the only one of its kind, capable of serving coffee at a refreshingly low temperature straight into the cup. The result: pure, undiluted flavor, exactly as it was meant to be enjoyed.

Built for both flexibility and performance, it features large bean hoppers to keep up with high demand locations, a large brewing capacity to serve multiple drinks in a single cycle, and an internal waste bin designed to handle continuous use with ease. GS DualBrew's thoughtful design ensures effortless operation and convenience, whether for a quick cup or a steady flow of service.

Beyond performance, this machine is also about experience. From the first sip of a perfectly balanced hot coffee to the refreshing smoothness of an iced coffee, it allows barista-quality beverages to be served consistently, while maintaining the integrity of the beans' aroma and flavor.

Blending elegance, technology, and taste, GS DualBrew is crafted to satisfy modern coffee lovers hot or cold, without compromise.

TRUE TASTE IN EVERY CUP

Specifications
