MAINTENANCE TYPE						B						B			
MAINTENANCE TYPE									C						
MAINTENANCE TYPE			D			D			D			D			
MAINTENANCE TYPE									E			F			

A	Replacement of the components listed in table A.
B	Replacement of the components listed in table B.
C	Replacement of the components listed in table C.
D	Replacement of the components listed in table D.
E	Replacement of the components listed in table E or F.
Overall control	Report the data referring to the number of Cycles. Control of all the functions of the most important components of the machine: pumps, grinder, safety valve, expansion valves, volumetric meters, level probe, pressure sensor (pressure switch), correct sealing of the internal and external pipes of the machine, electrical connections. Control of the components through the Test Program to be carried out on the machine verifiable on the display. Brew unit: cleaning of the unit and control of the filters, alignment of the piston with the plane of the body of the unit, centering of the upper counter-plate with the coffee container, checking of the connecting rod and camshaft, lubrication of the guide shafts. Control settings: Make sure that all the parameters set for each selection are always correct, check the degree of grinding and the weight of the coffee powder for each single or double dose of both grinders, check the data set for each display function . Water hardness check and correct softener operation.
