

## Welcome to **the new way** of getting your **daily dose of caffeine.**

**Sophia Touchless Solutions** allows you to order coffee without having to touch anything other than your most trusted device: your smartphone.

### **Scan. Select. Enjoy.**

Scan the QR code directly on the brewer screen and order the recipes you love from your phone: exact same drink selections and options that you are used seeing on the touchscreen.

### **Safety is our priority**

Order confidently without compromising your health while reducing the risk of spreading bacteria and viruses.

Moreover, it relies on the highest security standards and the most reliable wireless technology available on the market.

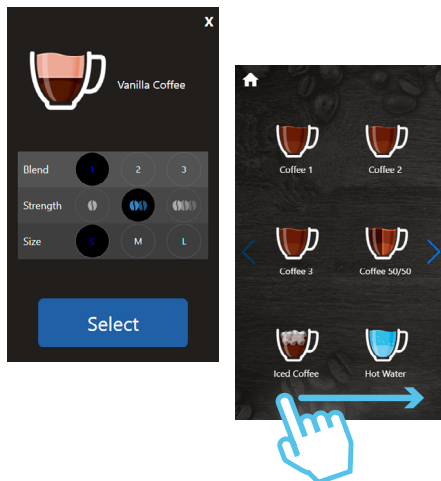

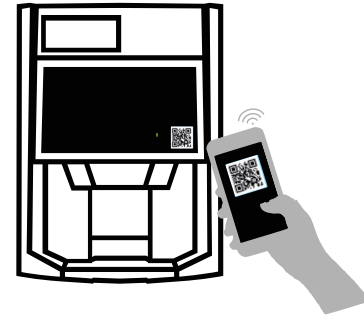

**It gives you peace of mind while you get your coffee.**

# SOPHIA TOUCHLESS SOLUTIONS

## Worry-Free Ordering

### 1. Scan

Locate the QR code on the machine screen and scan it with your smartphone. Being a web-hosted application, there is no need to install or to purchase anything. The selection menu will automatically appear on your phone.

### 2. Select

The app allows the same ordering options as the touchscreen of the machine in front of you, from available selections to cup sizes and strengths. Simply swipe between the selections and choose your favorite drink, then customize it to your needs.

### 3. Enjoy

Press the "Start" button (online solution) or scan the QR code on your phone (scanner solution) and let the magic happen. The coffee machine will automatically start your beverage preparation.

**... And do not forget to place your cup!**

Refer to our website for a complete list of compatible machines.
