

Remanufacturing

A Very Sustainable and Cost Effective Solution.

Expertly Remanufactured

Our machines are built to last using very durable materials and rigorous fabrication techniques. Even after many years of relentless service, most parts are still in good shape and can perform flawlessly for a much longer period of time. This leads to a very sustainable and cost effective solution: Remanufacturing.

We developed a no compromise process that gives a new life to your units and brings them back into modern days with the latest technology and software available.

We are very confident in our process: **Every unit comes with a like-new warranty.**

The Process

1. Disassemble the unit
2. Refurbish major components
3. Replace electrical and water system parts
4. Inspect everything else and replace if needed
5. Update the software to the latest version available
6. Rebuild and pack the unit

Remanufactured Units Options

Remanufactured Purchase

On occasion, we have ready-to-ship units for sale. They come in short, unpredictable supply and are very popular so they move fast.

Contact us to register to the waiting list and get notified.

Remanufactured Services

Send the unit(s) to our factory and get it back like-new. Every used unit is different making each remanufacturing project unique. It is important to evaluate the project before engaging in any expense.

To do so, please contact your sales representative.

Part Remanufacturing

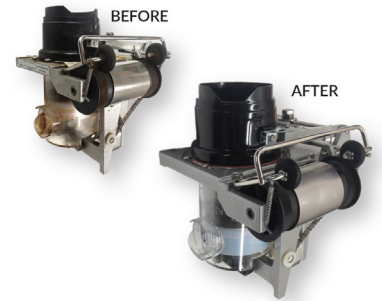

Brew Group Exchange Program

A brew group needs to be rebuilt after 25,000 cycles, which is about once a year.

The brew group is the heart of the equipment and is responsible for the taste of every cup. It needs to be serviced regularly to guarantee the quality of the beverages served.

This program ensures a constant running of the machine by receiving a replacement brew group to use while maintenance is performed on the actual brew group of the unit.

Remanufactured brew group comes with a one-year warranty.

Exchange Process

1. Upon request, we ship a factory remanufactured brew group to you. The item is invoiced at retail cost.
2. Replace your old brew group with the one you just received.
3. Use remanufactured brew group packaging to pack the old one
4. Ship the package back to us within 15 days.
5. Upon confirmation of the old brew group proper condition, a credit is issued on your account.

Screen and Main Board Remanufacturing Program

Remanufacturing solutions for touch screens and main boards are available on selected models.

These parts come with a 6-month warranty.

The exchange process is the same as in the Brew Group Exchange Program.

To verify the compatibility of your screen or main board, please refer to the brochure.
