

GRINDERS

PERFECTION WHEN YOU NEED IT

GAGGIA
MILANO

G10 EVO SHOWN

THE STORY OF ONE OF THE WORLD'S MOST ICONIC ITALIAN BRANDS BEGAN IN 1930s MILAN.

In 1938, barista Achille Gaggia filed the patent that signalled a revolution in the way aromas are extracted from coffee. Gaggia had created, for the very first time, the perfect Italian espresso - complete with its characteristic 'crema'.

Gaggia's mission today is the same as it's always been: to share authentic Italian espresso with the world. The company's intrinsic values of tradition and professionalism are self-evident throughout its product range, which has been designed to meet the requirements of coffee professionals by combining state-of-the-art technology with sophisticated design.

FOCUSED ON THE BARISTA

G10 evo & G5

Available in white and black, our G10 evo and G5 grinders are synonymous with ergonomic, elegant and modern design. Smart technology makes them exactly what baristas are all about: Consistency, Rapidity and Relentlessness.

Reliability and Accuracy: Both G10 evo and G5 have an extremely accurate calibration knob allowing you to make quick, real time adjustments to achieve the perfect grind in a bliss.

EXCLUSIVE GRINDING MODES DELIVER UNMATCHED EFFICIENCY

G10 evo and G5 are the fastest fresh coffee grinders on the market: Double or single doses at the touch of your filter holder!

CHOOSE BETWEEN THREE GRINDING MODES:

1. Dose On Demand (Patented)

Automatically pre-grinds the next coffee dose so that it is readily available when you need it. It is ideal for rush hour's high consumption peaks.

2. Grind On Demand

Instantly grinds and dispenses the dose when you ask for it.

3. Manual Grind

Have it your way and demonstrate your unique specialty coffee crafting skills.

Going from one mode to the other is done in seconds, allowing you to adapt to consumption levels any time during the day.

Both G10 evo and G5 grinders have an intuitive user interface; setting them up is as easy as it can be. They also provide complete statistics reports through the Espresso Link app or USB port.

OTHER FEATURES

- Instant grinding activated by microswitch
- Double or single doses
- Precise grinding adjustment knob with 0.002 mm steps
- Exclusive hopper design
- Durable flat steel grinding blades
- Bluetooth App
- USB Port
